Has potential. I really like where it is going. I really enjoy the setting and support the developer with this title all the way.. It's clever, but there is too much light pulsing on the screen, it gives an immediate headache. You can't turn it off in the options because the menu is broken. I don't know what these guys were thinking about... It's like playing the rainbow road on Mario kart, but the entire game all the time... hurts your eyes and head, I really wanted to like this :( My humble advice is don't buy it right now, until they fix the horrendous controls. I tried with the vr controllers and an xbox joystick and it has a lot of problems with both. Tried about a dozen times to not just drive into the water after I got off the carrier. I see others have said the same. If this is fixed, I will update this review. Until then do as much as you can to see if you think you'll be able to get the controls working properly.. It's bad! really boring and poorly made I thought it'd be fun in an ironic kind of way like Hunnie Pop but nope it's cancer. This game is quite simply a total disappointment. I love tycoon/economy games, this is about 5 minutes of game play followed by aeons of not playing it with some mixed in regret and ultimately a feeling that I was conned out of dollars I could have had more fun flushing down a toilet.. Sound is a great mechanic for a minimalist game that was originally a phone game and with the encouragement of using headphones the game becomes scarier due to the visual use of the sound mechanic.. Awesome little naval strategy game by an awesome and dedicated game Dev. If the video and screen shots interest you at all then I'd recommend buying it, you'll enjoy it.. The first game in years that's managed to recapture that 'something' I remember games having back in the days of the Spectrum and Atari ST. I've been finding it challenging not just to play, but to put down as well!

Very, very enjoyable indeed and well worth seven quid of anyone's money :) If you found the lack of stats and crappy UI in Skyrim annoying and want something a bit more 'Authentic' for an RPG, then do give this a go. The demo's huge, btw, and will keep you busy for a good afternoon...

More of a glorified iPhone game than a PC game, especially compared to games like Battlestations Pacific, its only really worth getting your hands on if you have a much neglected itch for proper WW2 naval combat. Everything from tiny PT Boats and submarines to the Yamato and Yorktown are included in this game.. Cool, so cool. I want an expansion pack!. Great classic adventure game with a well thought out hint and achievement system to keep you interested. Around 8 hours long as well if you do everything!. Amazing pack of DLCs for an amazing game. The new helicopters and different crates work beautifully with the new slingloading system and gives a lot more freedom to mapmakers for insertion\extraction or support during missions. The new weapons and wookiee-suits are quite nice too, but the real star in this pack is obviously the go-carts and the very hard but manageable time trials!. Played it a bit.

Its pretty good.. It's probably not my type or something, but all i noticed in this game was you walk down a badly lit (and not that greatly rendered) corridor, you can look right and left into other always empty corridors (maybe at some point they would get a monster as well. As you do a quick turn around you notice there is a monster following you inthe first coridor. But you can't do anything other than looking at it.. The only reason to buy this game is for easy achievments. Avoid if you couldnt care less about them. This is a good game about turning letters into words and watching anime characters make jokes.

all games of this ilk need to have leaderboards like this one does.. please don't buy this game

it doesn't seem to have an end and the minigames have no instructions and the music doesn't loop right and uGH. Nice game!@@\u7d20\u6674\u3089\u3057\u3044##
